## Research Experience

### Research Intern

May-August, 2018

Microsoft Research, New York, USA

Advisors: Alekh Agarwal, Nan Jiang, Akshay Krishnamurthy, and John Langford

Studied sample complexity of Reinforcement Learning in Contextual Decision Processes (CDP) and developed a sample efficient model-based algorithm for CDPs.

### Research Intern

May-August, 2017

Yahoo Research, New York, USA

Advisor: Alina Beygelzimer

Worked on a new problem named *Contextual Memory*. Designed and studied the feasibility of a learning memory controller which inserts new memories into an experience store of effectively unbounded size and optimizes queries for memories from the same experience store.

### Research Intern

May-August, 2016

Microsoft Research, Redmond, USA

Advisors: Ashish Kapoor and Debadepta Dey

Studied the problem of risk-aware contextual bandits. Developed an algorithm that explicitly considers risk constraints while learning. The developed algorithm achieves near-optimal regret in terms of maximizing reward while satisfying the risk constraints in average.

## Teaching Experience
